

2020 Provider

Biopsy Procedure Codes

When billing for punch biopsies for Epidermal Nerve Fiber Density Testing it is appropriate to bill code 11104 for the first biopsy, and 11105 for each additional biopsy that you perform on the patient. It is billed as a procedure, so be aware that certain insurances may not allow a procedure to be added onto an office visit on that same date (please consult your insurance providers to verify). However, you can add it on to another procedure with a 59 modifier if one happens to be performed on that same date.

Please contact me with any questions.
